Experience

2020	**Lumen Project**	Nalys

Embedded Software Engineer
Working on an internal project for Nalys using technologies such as Qt5, C++ and OpenCV.

2019-2020	**City-labs Project**	UCLouvain (ICTEAM/ELEN) - FEDER

Research Assistant
As IT side of "City-labs" project, our main research goal is to address eHealth field by promoting and facilitating the use of ICT in order to empower patients with chronic diseases. More particularly, we aim to improve diabetic patients' care path by developing a pilot diabetes remote monitoring system and bring together health professionals and enterprises.

2017-now	**Freelance Developer**	Derwaan

Fullstack Web and Mobile Developer
Working as a Student-Freelance in Belgium for Web and Mobile projects.
Clients testimonials:
- "Delivery on time and impeccable. Looking forward to working again together!" - Max H. de Tecsin (SPRL)
- "Great job: the code is very clean, no frills. Julien is available, attentive to customer needs and takes into account specificities for development." - David M.
- "Julien developed very quickly the website that I wanted, with blogs, a tariff page, a contact page and a profile page. He himself chose images that stick to the titles." - Philippe G.

Education

2016–2019	**Master in Computer Science**	Université catholique de Louvain

Specializations: Network and Artificial Intelligence
Master thesis: Benchmarking Framework for Real-Time Operating System Applications - Study and implementation with Contiki and RIOT
